DETAILED ACTION

Election/ Restriction

Claims 1-43 are pending in this application.

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. **Claims 1-23**, drawn to a semiconductor device having a metallization layer, classified in class 257, subclass 758.

- II. **Claims 24-43**, drawn to a method of making a semiconductor device having a metallization layer, classified in class 438, subclass 118.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case unpatentability of Invention I would not necessarily imply unpatentability of Invention II, since the device of Invention I could be made by processes materially different from those of Invention II. For example, the device of Invention I could be made by forming an opening through the dielectric layer and the thin stop layer by a time-controlled, one-step etching of the dielectric layer and the thin stop layer, rather than by "forming a layer of dielectric over said layer of thin stop, said layer of dielectric defining at least one area where said thin stop layer is exposed; and

Art Unit: 2818

removing said exposed thin stop layer to expose a top surface of said metallization layer which is substantially free of damage” as recited in Invention II.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different classification and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tu-Tu Ho whose telephone number is (571) 272-1778. The examiner can normally be reached on 6:30 am - 5:00 pm.
